Video 3 Skill Sheet - Flute Assembly Exercises

1. Identification, Please!

- Open your flute case, and take out one piece.
- See how quickly you can say the name of that piece out loud.
- If you'd like an extra challenge, have your parents choose the pieces for you!

2. Avoid those Mechanisms!

- Practice picking up and holding each part of your flute without squishing the rods or keys.
- See if you can pick up each part 5 times in a row with no squishing!

3. Assembly Line

- Put your flute together and take it apart 5 times each day.
- Be sure that your hands aren't squishing the rods or keys.
- Is your tone hole lined up with your "only child" key?
- Is the rod on your footjoint pointing to the middle of the next circular key?

Practice Chart

Each time you do one of the exercises above,
check it off below. The more checks you get,
the better you'll become at playing flute.
